Subject: Aryl Maps, Contacts and EPA Logos

See attached..... Action Memo is on the private side of the OSC Website..... GE Capital was the holding company for Bill Kraus (Bldg owner)..... Stachurski was the owner of Aryl..... any questions give me a call..... I also have a set of keys for the building but there are many keys to many parts of the building ? I also don't know if the town or bank has since changed locks ?

**FAXED**

Mr. Bruce Sprague  
Emergency & Remedial Response Division  
United States Environmental Protection Agency Region II  
2890 Woodbridge Avenue  
Edison, NJ 08837

Dear Mr. Sprague:

Aryl, Inc.  
21 Isabelle Street  
Buffalo (C), Erie County

The New York State Department of Environmental Conservation (NYSDEC) is writing this letter as a follow-up to a field discussion with Mark Gallo (Site OSC) at the above-noted site on April 28, 2004. It was noted that USEPA was completing off-site disposal of wastes at the time of the inspection, with anticipated demobilization to occur within the next few weeks.

During the site inspection, it was noted that there was still evidence of spillage exhibited on the ground in and around the site. Staining and unknown contaminants in sumps were observed. An underground storage tank is allegedly still in-place in the site courtyard along with several (in-service) transformers allegedly containing PCBs. The areas where the operator of the facility is still working have numerous containers of chemicals purportedly being used by him. No utilities are provided to the rental unit occupied by this tenant and the building is in substantial decay.

It is my opinion that the observed staining and the reported resistance of the facility operator to allow a more thorough removal indicates that surface and subsurface contamination is likely to exist. The prolonged operation of a chemical processing company with poor housekeeping practices solidifies this assumption even more. The property owner and the facility operator have both expressed their inability to pay for site work. Due to this, the NYSDEC is requesting that the USEPA perform additional investigation work at the site to determine if surface and/or subsurface contamination is present at levels of concern.

Mr. Bruce Sprague  
May 18, 2004  
Page 2

The sampling effort should include the collection of groundwater for analysis. This work should be done prior to USEPA discontinuing their current site access agreement. My office stands by to lend every assistance necessary to complete this environmental assessment.

If you have any questions regarding this request, please contact me or Mr. David Szymanski at (716) 851-7220.

Sincerely,

Martin L. Doster, P.E.  
Regional Hazardous Waste Remediation Engineer
